INTRODUCTION

The National Plan for Agroecology and Organic Production (Planapo) is a Federal Government’s policy aiming at widening and consolidating actions towards a sustainable rural development. Fruit of a massive debate and participatory construction involving a number of Government bodies, of forests and rural social movements, Planapo is the main instrument to implement the National Policy for Agroecology and Organic Production (Pnapo). However, it’s not all. The Plan seeks to integrate and qualify the various policies and programmes carried out by each of the ten ministries participating in its execution.
OBJECTIVE
Articulating and implementing programmes and actions fostering the agroecological transition, the organic and agroecological based production as a contribution for sustainable development, making possible for the population to have a better quality of life through the offer and consumption of healthy food and the sustainable use of natural resources.

DIRECTIONS
Activities developed under the Planapo should seek the following directions:

- Promoting food safety and nutritional sovereignty and the human’s right to healthy and adequate eating;
- Promoting the sustainable use of natural resources;
- Supporting the conservation and recovery of the modified ecosystems by privileging the use of production systems that reduce pollutant residues and the dependence on external inputs for production;
- Promoting fair and sustainable systems of production, distribution and food consumption.

- Adding value to the agrobiodiversity and the sociobiodiversity products as well as stimulating local experiences of usage, conservation and management of vegetal and animal genetic resources;
- Enhancing the participation of rural youth both in the organic and agroecological based production;
- Contributing to mitigate gender inequalities through actions and programmes to foster the women’s economic autonomy.
BENEFICIARIES

Family farmers, settlers in general and settlers of the land reform, traditional peoples and communities, including rural youth and their economic organizations that may want to strengthen or modify their productive practices into agroecological or organic productions.

ACTIONS

The actions coordinated by the ten ministries that form a partnership around the Plan [Planapo] make up a conjunct of 134 initiatives, arranged in 14 goals and organized according to the following strategic actions:

I. Production;
II. Use and Conservation of Natural Resources;
III. Knowledge;
IV. Commercialization and Consumption.
Check out some of the actions PlanApo 2015:

- Provide BR$ 7 billion (US$ 2.7 billion) in agricultural credit of the National Program for Strengthening Family Farming Program - Pronaf and agricultural and livestock Harvest Plan;
- Promoting Technical Assistance and Rural Extension - ATER agroecological to 75,000 families, with 50% participation of rural women;
- Promote ATER to transition from sustainable production systems for family farmers, agrarian reform settlers, fishermen and fish farmers, traditional population and rural youth;
- Develop and provide technological innovation agroecological family farmers;
- Promoting agro-ecological training or with an emphasis on agroecology for family farmers, youth and technicians ATER;
- Reach 50,000 production units, adjusting to the organic production;
- Deploy 60,000 social technologies units of access to water production;

- Supporting the conservation, multiplication, availability, distribution and marketing of seed and Creole and varietal seedlings, suitable for organic production and agro-ecological basis;
- To support the promotion and marketing of organic and agro-ecological products;
- Increase the share of organic and agroecological products in local markets, regional and institutional.

The total amount to be invested by the ministries over the three years of Planapo execution will be of BR$8.8 billion.
Two sectors manage Pnapo:

- Interministerial Chamber of Agroecology and Organic Production (Ciapo), on the Government side, in charge of building up and executing Planapo, coordinating the different bodies and entities of the Federal Executive Branch.
- National Commission for Agroecology and Organic Production (Cnapo) equally composed by Government on one side and the social civil society on the other. Its is a Comission for dialogue, participation and social control of the Planapo.
